

Forsan High School Welding Program

The Forsan welding program will be manufacturing and selling various metal art images as a fundraiser this year. Please take a look at the images of our work. Although the examples are football related, we can do almost anything in the way of metal art for all other sports as well as band. We can add a spike or frame to any of these in order to support them as “yard art”. The money earned through this activity will be used to purchase materials, supplies, and travel for contests. Please feel free to contact us if you have ideas of your own that you want cut out. We will also have holiday art in season. If you choose to make an order, please use the form below and send to Forsan High School office or email it to kbagnall@esc18.net .

Thanks,
The Students of Welding Class
